## Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

### **EXAMINER'S COMMENT**

Applicant is informed that examiner made a correction to the misspelled word "beign" in claim 22 on page 7, line 7 of Amendment A, filed on October 3, 2002. The word was replaced with "being".

Allowed Claims: 1-25.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103.

Specifically, with respect to independent claim 1, none of the prior art alone or in combination disclose or teach of a zoom lens as claimed specifically wherein, during zooming from a wide angle to telephoto end, a space between first and second lens units decreases and a space between second and third lens units increases and the claimed condition regarding number of lens elements per lens unit is satisfied.

Specifically, with respect to independent claim 9, none of the prior art alone or in combination disclose or teach of a zoom lens as claimed specifically wherein, during zooming from a wide angle to telephoto end, a space between first and second lens units and second and third lens units decreases and increases respectively, the claimed condition regarding number of lens elements per lens unit is satisfied and the third lens

Art Unit: 2873

unit moves along a convex locus to the image side in zooming from the wide angle to the telephoto end.

Specifically, with respect to independent claim 21, none of the prior art alone or in combination disclose or teach of a zoom lens as claimed specifically wherein, during zooming from a wide angle to telephoto end, a space between first and second lens units and second and third lens units decreases and increases respectively, the claimed condition regarding number of lens elements per lens unit is satisfied with the second lens unit consisting of 3 lens elements.

Specifically, with respect to independent claim 22, none of the prior art alone or in combination disclose or teach of a zoom lens as claimed specifically wherein, during zooming from a wide angle to telephoto end, a space between first and second lens units and second and third lens units decreases and increases respectively, the claimed condition regarding number of lens elements per lens unit is satisfied and the thickness of the positive lens element constituting the cemented lens of the second lens unit is greater than a thickness of the negative lens element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2873

### **CITATION OF RELEVANT PRIOR ART**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nishio (U.S. 5,523,888A) is being cited herein to show a zoom lens comprising many of the claimed structural limitations of that of the claimed invention with the exception of the claimed condition regarding the number of lens elements per lens unit.
